

■ PAID FEATURE · EVENT MANAGEMENT

Event Management: create, approve, register, attend, and learn from events.

A complete campus event lifecycle: draft events, approval, discovery, registration questions, QR attendance, community sharing, ratings, and post-event feedback.

PRIMARY USERS

Students · Event Creators · Event Coordinators

■ FEATURE OVERVIEW

From event idea to attendance proof.

Event Management lets a university run student-facing events in one place. Staff can create events, route them for approval, publish them to students, collect registrations, scan QR codes at entry, and review attendance and feedback after completion.

What the client gets

When Active, the module unlocks the Event dashboard, My Events, Registered Events, Upcoming Events, Pending Events, Create Event, draft handling, approval flow, registration questions, QR attendance, ratings, feedback, and community sharing.

6

Dashboard sections for event status

3

Event types: physical, virtual, hybrid

QR

Attendance verification on event day

360

Lifecycle view from draft to feedback

■ WHAT USERS CAN DO

Events are managed as a full workflow, not a simple listing.

CREATE

Build event details

Add title, description, date/time, location or link, category, type, maximum participants, image, and coordinators.

QUESTIONS

Ask registration questions

Collect required answers such as preferences, expectations, consent, dietary notes, or eligibility checks before registration completes.

APPROVE

Review before publishing

REGISTER

Student registration

University Event Coordinators approve, reject, or request changes before events appear in Upcoming Events.

Users browse approved events, open details, answer questions, register, and receive a QR code for attendance.

ATTEND

QR attendance

Event Coordinators scan the QR code at entry so attendance is based on proof, not manual spreadsheets.

IMPROVE

Ratings and feedback

Completed events collect star ratings, comments, and attendee feedback for future planning.

Detailed functionality map

AREA	DETAILED FUNCTIONALITY	WHAT THE CLIENT CAN EXPLAIN
Event creation	Name, description, start/end date and time, physical location or virtual link, category, event type, capacity, image, and coordinators.	Events are structured records, not simple announcements.
Draft mode	Creator can save incomplete events privately before submitting for approval.	Teams can prepare events without accidentally publishing them.
Registration questions	Creators can ask custom questions such as preferences, consent, dietary needs, interests, or expectations.	Registration collects useful planning information before the event.
Approval	University Event Coordinator reviews submitted details, timing, audience fit, capacity, safety, and policy alignment.	Students only see events that have passed review.
Registration	Users register for approved events, answer required questions, and receive confirmation/QR context.	Attendance starts with a real registration record.

AREA	DETAILED FUNCTIONALITY	WHAT THE CLIENT CAN EXPLAIN
QR attendance	Coordinator scans QR code at the venue to mark registered users as attended.	The university gets proof-based attendance, not guessed headcount.
Community sharing	Approved event cards can be shared into relevant communities where Community is Active and sharing is allowed.	Events can reach the right group without duplicate posts.
Feedback	Completed events can collect ratings, written feedback, and comments for future planning.	Event quality improves from actual attendee response.

■ ANIMATED EXPLANATION

How event information is created, reviewed, and approved.

PLAY STORY

● USER

● ADMIN

● UNIVERSITY

● DECISION

CURRENT ACTOR

Event Creator

Operational staff review, publish, moderate, or approve.

ADMIN ACTION · 1 OF 9

Enter event details

Creator prepares a complete event record.

Outcome: Creator can save as Draft or submit the event for approval.

INFORMATION TAKEN

Event name, description, date/time, category, event type, location/link, capacity, image, coordinators, and optional questions.

HOW IT IS REVIEWED

The form checks required event details and keeps drafts private until submission.

DECISION / RESULT

Creator can save as Draft or submit the event for approval.

Create, review, and publish event flow

USER ACTION · 1 OF 7

Answer questions

Student registers for an approved event.

Outcome: Student is registered and receives event confirmation.

INFORMATION TAKEN

Event detail, date/time, location/link, capacity, registration questions, and consent answers.

HOW IT IS REVIEWED

App checks required answers and confirms registration availability.

DECISION / RESULT

Student is registered and receives event confirmation.

Registration, QR attendance, and feedback flow

■ ROLES AND BOUNDARIES

Who does what in Event Management.

ROLE	CAN DO	BOUNDARY
Regular user	Browse approved events, register, answer questions, show QR code, submit feedback.	Cannot publish or approve events.

ROLE	CAN DO	BOUNDARY
Event Creator	Create drafts, submit events, assign coordinators, see registrations and ratings.	Submitted events require approval before becoming public.
Event Coordinator	Approve/reject events, manage assigned execution, scan attendance, review event operations.	Owns event readiness and on-ground validity.
University Super Admin	University-wide oversight and governance where configured.	Uses event data for tenant-level reporting.

■ FAQs

Event Management questions clients usually ask.

What is Event Management?

+

What information is entered when creating an event?

+

Can an event be saved before it is ready?

+

Who approves events?

+

When does an event appear to students?

+

Can creators add registration questions?

Can users register for events?

Can coordinators verify actual attendance?

What happens if a registered user does not attend?

Can events be shared to communities?

Can events be physical, virtual, or hybrid?

Can attendees provide feedback?

What event statuses are important?

How does Event Management help staff?

What happens when inactive?
