

■ PRODUCT CATALOG · INTOTO PAID FEATURES

What Intoto provides to universities

Intoto is sold as **seven standalone paid modules** — not an all-or-nothing platform license. This catalog explains each module, what it unlocks for students and staff, and how Intoto Admin and University Super Admin interact with subscriptions. Written for Product, Sales, QA, and client demos.

- Product
- QA
- Marketing

MODULES	MODEL	PROVISIONED BY
7 standalone paid features	À la carte — one, several, or all	Intoto Admin
VISIBLE TO UNIVERSITY		
My University → Features tab		

■ AT A GLANCE

The Intoto product catalog for universities

Every university on Intoto subscribes to a custom mix of paid modules. A institution can start with a single feature — often **User Management** — and add **Chat**, **Travel Plan**, or others at any time. Each module is independent: its

own contract dates, its own Active/inactive state, and its own set of admin tools and student experiences.

The one-paragraph version

Intoto Admin provisions modules when onboarding or updating a tenant. The **University Super Admin** sees what is live on **My University → Features** — read-only cards with Active status, Start/End dates, and (for User Management) seat capacity. When a module is Active, its sidebar entries and student-facing surfaces appear; when inactive, that functionality is hidden entirely.

Add modules as needs grow

1 tab

University view — My University → Features

■ COMMERCIAL MODEL

How subscriptions work

Intoto does **not** require universities to buy the full platform. Sales and onboarding agree on which modules the tenant needs; Intoto Admin enables them on the backend. The university admin sees the result on the **Features** tab — they cannot toggle modules themselves.

- 1

Sales / onboarding agrees module list, seat counts, and contract dates with the university.
- 2

Intoto Admin provisions modules when creating the tenant or updating an existing university.
- 3

University Super Admin opens **My University → Features** to confirm what is Active before inviting users or promising capabilities.
- 4

When a new module is added mid-contract, it appears on the Features tab with its own Start/End dates; related sidebar tools unlock automatically.

ON EVERY FEATURES CARD (UNIVERSITY PORTAL)	MEANING
Title & description	Commercial module name and one-line summary shown in the web portal.
Active	Module is currently entitled — admin tools and student experiences are available.
Start Date / End Date	Subscription window (example: Jul 13, 2025 – Jul 13, 2026). Outside this range the module is inactive.

Example mix: Year one — **User Management** + **Chat** only. Before next intake — add **Travel Plan**, **Ambassador Management**, or **Mobility Program**. Each module bills and renews independently.

MODULE	PRIMARY AUDIENCE	KEY SURFACES WHEN ACTIVE
Ambassador Management	Prospective & new students · peer & external mentors	Ambassador directories · mobile carousel · Ambassador Platform
Travel Plan	Incoming students · arrival coordinators	Travel lists · arrival status · campus travel tab

Module	Primary Audience	Key Surfaces When Active
Community	All students · community coordinators	Groups · feeds · pending requests · reports
Chat	Students · ambassadors · staff	1:1 & group messaging · mobile Chats tab
Event Management	Students · event coordinators	Event lifecycle · registration · attendance · feedback
User Management	University Super Admin · all roles	Manage User · Invite Data · Profile Review · seat limits
Mobility Program	International office · mobility program admins · university leadership	Applications · approvals · nominations · programs · partners · reports

01 Ambassador Management

Portal card copy: Connect students with ambassadors.

Structured ambassador program for peer mentors (in-app) and external partners (web portal + Ambassador Platform). Universities run discovery, invitation, and oversight of ambassador rosters. Students find mentors via the mobile Ambassadors carousel; prospects use The Ambassador Platform directory when External Ambassadors are enabled.

WHEN ACTIVE	WHEN INACTIVE
Dashboard Ambassadors / External Ambassadors cards · Sidebar ambassador lists · Ambassador detail views · Invite ambassador roles · Student discovery carousel	No ambassador sidebar or dashboard cards · No ambassador invites · No student ambassador discovery

● PRODUCT

Bridges pre-enrollment (Ambassador Platform) and enrolled student support (in-app mentors) under one commercial module.

● QA FOCUS

Active card → ambassador tools visible; inactive → hidden; external + internal paths both gated by same entitlement.

● MARKETING

"Give every incoming student a peer mentor — on mobile and on the web."

02 Travel Plan

Portal card copy: Manage student travel arrangements.

End-to-end travel and arrival tracking — flight details, transit status, and on-campus arrival. Super Admins and coordinators see who is arriving, in transit, or already on campus. Scoped per campus on the Campus → Travel Plans tab.

WHEN ACTIVE	WHEN INACTIVE
Dashboard Travel Plans card · Sidebar Travel Plan module · Travel detail by status · Campus Travel Plans tab · Mobile oversight	Travel sidebar and dashboard hidden · No travel lists · No campus travel tab

● PRODUCT

Critical for international intake — visibility into arrival pipeline without spreadsheets.

● QA FOCUS

Student travel forms save; admin lists filter by status; inactive module hides all travel UI.

● MARKETING

"Know who is in the air, on the ground, or on campus — before they knock on your door."

03 Community

Portal card copy: Student connections & groups.

The **Community** paid feature lets people at a university discover, join, create, and engage with topic-based groups. It provides a social feed experience where members share posts, interact with content, and participate in discussions inside approved communities. Coordinators (and University Super Admins on web) create official communities and govern requests; students and Third-Party Coordinators propose new communities, join approved ones, and take part in discussions. When Active, sidebar Community tools, the mobile Community tab, feed/explore/my-community sections, posting, engagement, and report triage unlock. When inactive, those surfaces are hidden.

What Community unlocks

Feed for joined-community posts → Explore for discovery and joining → My Community for created/admin communities → request approval before a user-created community goes live → active community profiles with posts, members, rules, and engagement. Members can like, comment, reply, share, report, open profiles, and share posts or events into chat/community contexts.

Core sections

SECTION	PURPOSE	KEY BEHAVIOURS
Feed	Primary engagement screen for content from communities the user has joined.	Shows a mixed feed sorted by relevance or time · only joined-community content appears · supports search across feed posts (currently by post creator name).
Explore	Discovery surface for available approved	Users browse the community list, open community details, and join communities

SECTION	PURPOSE	KEY BEHAVIOURS
	communities.	of interest.
My Community	Ownership/admin area for communities the user created or administers.	Create a new community · manage existing communities · view communities in pending/active states depending on permissions.

Roles & permissions

A university can staff any number of Community Coordinators as a team. Approvals and official creation also sit with the University Super Admin on the web portal.

1. Community Coordinator

Operational owner of groups and safety for one university (also known informally as social-media coordinator).

CAN DO
Create communities on various topics — published instantly (no student approval wait)
Review and approve or reject community creation requests from students or other roles
Moderate discussions and remove inappropriate content
Delete or archive communities when needed
See community feeds with the latest post surfaced
Like, comment, and share posts
Initiate chat with users and view profiles
Handle pending creation requests and community reports

CAN DO

Work as part of a team — any number of Community Coordinators can share the queue

2. Student

CAN DO

Submit a community creation request — goes for approval (not live until approved)

Join approved communities and participate in discussions

Post content in communities they have joined

View posts in joined communities; feeds show the latest post

Like, comment, and share posts

Initiate chat with users and view profiles

3. Third-Party Coordinator

CAN DO

Submit a community creation request — goes for approval like a student request

Join approved communities and participate in discussions

Receive suggestions for joining communities relevant to their interests or role

Post content in communities they have joined

See feeds with the latest post; like, comment, and share

CAN DO

Initiate chat with users and view profiles

University Super Admin (web): Can create communities instantly and clear the pending request queue (approve/reject), plus moderate from the web Community module — same governance outcomes as the Community Coordinator, for university-wide oversight.

Community creation workflow

The Community module separates trusted staff creation from user-submitted creation requests. A community is only discoverable and joinable after it becomes **Active**.

Coordinator / Super Admin creation

- 1 Community Coordinator (or University Super Admin on web) creates a community on a topic.
- 2 The community publishes **instantly** — no pending approval step.
- 3 It becomes visible to relevant roles (Students, Third-Party Coordinators, and staff who can browse communities).

Student or Third-Party Coordinator request

- 1 Student or Third-Party Coordinator submits a request to create a community.
- 2 The request lands in the **pending** queue for Community Coordinator / University Super Admin.
- 3 Until approval, the community remains in **Pending** state: only the creator and approving coordinator/admin can see it; other users cannot search, view, or join it.
- 4 **Approved** — community is created and visible to relevant users; requester is notified.
- 5 **Rejected** — community does not go live; requester receives a notification with the rejection reason.

Community profile & navigation

TAP / ENTRY POINT	DESTINATION / BEHAVIOUR
Community name	Opens the Community Profile page with community name, description, rules, follower/member count, member list, and community posts.
Followers / members count	Opens the list of users following or participating in the community; each user is tappable and opens the User Profile page.
Post creator name or profile image	Opens the creator's User Profile page.
Search result creator name	Opens the matching user's profile from feed search results.

Participation & engagement

AREA	WHAT HAPPENS
Joining	Students and Third-Party Coordinators browse and join approved communities. Third-Party Coordinators may also get join suggestions based on interests or role.
Posting & interaction	Members post discussions and updates inside approved communities only. Feeds show the latest post . Members can like, comment, and share. Coordinators and Super Admins moderate and remove inappropriate content.
Chat & profiles	From community context, users can initiate chat with others and view profiles (subject to Chat module and privacy rules).

Post creation, post types & sharing

Posts are created from the **Community Profile** page using **Create Post**. Post creation is allowed only in approved/active communities; it is not allowed while a community is pending.

POST TYPE / OPTION	WHAT USERS CAN PUBLISH OR SHARE
Text	Plain discussion or announcement post.
Photo	Single image post.
Multiple photos	Gallery-style post with more than one image.
Video	Video content inside the community feed.
Document	Document attachment such as PDF or DOC.
Event shared as post	Event can appear in a community as a shareable event card.
Sharing	Share a post within a community or share to direct/group chat.

Post actions, comments & reporting

INTERACTION	BEHAVIOUR
Like count	Tapping a post's like count opens the list of users who liked it; each user opens their profile.
Comments	Users can comment on posts, like a comment, reply to a comment, like a reply, and share images within comments.
Share	Posts can be shared onward where sharing is available.
Report	Every post has a three-dot menu for reporting content that violates community rules, supporting moderation and a healthy discussion environment.

Search

SEARCH AREA	CURRENT BEHAVIOUR
Feed search	Search is supported from the Feed section. Current scope: post creator name . Enter a creator name → matching posts created by that user are displayed → tap the creator name to open User Profile.

Visibility & notifications

Once a community is created by a coordinator/Super Admin or approved from a request, it is visible to relevant users. Users are notified when:

EVENT	WHO TYPICALLY HEARS ABOUT IT
A new community becomes available	Relevant students and staff in discovery / suggestions

EVENT	WHO TYPICALLY HEARS ABOUT IT
A post is made in a joined community	Members of that community
Their creation request is approved or rejected	The student or Third-Party Coordinator who submitted it (rejection includes reason)

WHEN ACTIVE	WHEN INACTIVE
Sidebar Community (pending, active, reports) · Dashboard analytics · Mobile Community tab · Feed / Explore / My Community · creation / join / post engagement · search · moderation/reporting · notifications for new communities, posts, and request outcomes	Community module hidden · Students cannot create or join groups · Feed/Explore/My Community unavailable · No community posting or report triage

Role guide: Day-to-day coordinator screens and QA steps are in the [Community Coordinator Feature & Flow Guide](#).

● **PRODUCT**

One paid module serves three participation models — trusted publish for staff, gated requests for students and partners, and shared engagement once live.

● **QA FOCUS**

Module Active → coordinator create live immediately; student/TPC request pending until approve/reject; reject notifies with reason; join, latest-post feed, like/comment/share, reports, TPC suggestions when configured. Inactive → all community UI hidden.

● **MARKETING**

"Topic communities with a clear approval path — students propose, coordinators publish, everyone engages safely."

04

Chat

Portal card copy: Direct messaging between users.

Secure 1:1 and group messaging between students, ambassadors, coordinators, and staff. Often purchased alongside Ambassador Management and User Management but sold independently.
Web: create groups and message any user. Mobile: Chats tab.

WHEN ACTIVE	WHEN INACTIVE
Sidebar Chat · Group creation on web · Mobile Chats tab · Bulk outreach where mail enabled	Chat sidebar and mobile tab hidden · No in-product messaging

● PRODUCT

Real-time connection layer — separate SKU so light deployments can skip messaging cost.

● QA FOCUS

Send/receive works when Active; compose and inbox absent when inactive.

● MARKETING

"One secure inbox for students, mentors, and staff — no personal numbers required."

05

Event Management

Portal card copy: Create and manage campus events.

The **Event Management** paid feature enables users to create, manage, discover, register for, attend, and review events within the application. It supports the full lifecycle from event creation and approval to registration questions, QR-based attendance, community sharing, completion, ratings, and post-event feedback.

What Event Management unlocks

Dashboard Event card → Event Dashboard sections → create event with details, coordinators, and optional registration questions → save as draft or submit for approval → approved event appears in Upcoming → users register and receive QR code → coordinator scans attendance → completed event collects ratings and feedback.

Roles

ROLE	EVENT PERMISSIONS / RESPONSIBILITY
Regular user	View and explore events · register · attend using QR code · submit feedback after completion.
Event Creator	Create and manage events · add event coordinators · view registrations and event status.
University Event Coordinator	Review and approve created events · manage on-ground execution · scan QR codes for attendance.
University Super Admin	Oversight and approval on web where configured; can use event lifecycle tools for university-wide governance.

Entry point & Event Dashboard

Users enter through the **Event** card under dashboard quick actions. Tapping it opens the Event Dashboard, organized by event status and user relevance.

DASHBOARD SECTION	MEANING
My Events	Events created by the logged-in user; View All opens the My Events list.
Registered Events	Events the user has registered for.
Completed Events	Events whose end time has passed.
Assigned Events	Events assigned to the user as coordinator or volunteer.
Upcoming Events	Approved future events available for discovery and registration.
Pending Events	Events awaiting approval or action.

My Events list, search & filters

TOOL	BEHAVIOUR
My Events list	Displays all events created by the user.
Search	Search events by event name.
Status filter	Draft · Pending Approval · Approved · Completed.
Category filter	Filter by event categories.
Event type filter	Physical · Virtual · Hybrid.

Create Event flow

- 1

Open **Create Event** from the My Events list top-right action.
- 2

Enter required basic details: event name, description, date/time, location or virtual link, category, event type (Physical / Virtual / Hybrid), maximum participants, and event image.
- 3

Add one or more **Event Coordinators** to support execution and attendance handling.
- 4

Continue to optional **Registration Questions** — creators can add custom attendee questions such as expectations, preferences, or consent questions.
- 5

Choose **Save as Draft** or **Create Event**.

CREATION OPTION	RESULT
Save as Draft	Event is saved but not submitted; visible only to creator, inactive, and editable later.
Create Event	Submits the event for approval; a request is sent to the University Event Coordinator.

Approval & visibility

STEP	BEHAVIOUR
Review	University Event Coordinator reviews event details.
Approve	Event becomes Active and appears in Upcoming Events and the Event Dashboard.

STEP	BEHAVIOUR
Reject / request changes	Event is sent back to the creator and does not appear as an approved upcoming event.

Discovery, registration & community sharing

AREA	BEHAVIOUR
Upcoming Events	Users browse approved upcoming events and view event details, date, time, location, and coordinators.
Registration	Interested users register and answer any mandatory questions set by the creator.
Share Event	From Event Detail, three-dot menu → Share Event → select eligible communities → event is posted into the selected community as a shareable event card.

Creator insights, attendance & feedback

FEATURE	WHAT IT SHOWS / DOES
Total Registrations card	Shown on Event Details for creator; shows total registered users and total attendees after attendance is marked.
Registrations & Attendees list	Opens from Total Registrations; lists attendee name, registration status (Registered / Attended / Not Attended), and QR scan status.
QR code	Generated after successful registration and visible on Event Details for the registered user.
QR attendance	On event day, user shows QR at entry; Event Coordinator scans it; successful scan marks the user as Attended.

FEATURE	WHAT IT SHOWS / DOES
Completion	When event end time is reached, the event is marked Completed.
Ratings & reviews	After completion, View Ratings appears for creator and opens ratings/reviews: star rating, written comments, attendee name (per privacy settings), and submission date.
Feedback popup	After attending a completed event, users can rate the event and submit comments or suggestions.

WHEN ACTIVE	WHEN INACTIVE
Dashboard Event card · Event Dashboard sections · My Events list · Create / draft / approval flows · registration questions · community event sharing · QR attendance · registrations & attendees list · ratings and feedback	Events sidebar/dashboard hidden · no event creation, approval, discovery, registration, QR attendance, or feedback flow

● PRODUCT

One module covers the whole event loop: creation, approval, discovery, registration, QR attendance, and quality feedback.

● QA FOCUS

Draft is creator-only; submitted event waits for approval; approved event appears in Upcoming; mandatory questions block registration until answered; QR scan marks attendance; ratings visible only after completion.

● MARKETING

"From welcome week to career fairs — publish events, register students, scan attendance, and learn from feedback in one flow."

06 User Management

Portal card copy: Control user limits & invitations.

Foundation module — licensed seats cap how many users can be invited across all roles, with optional domestic vs international split. Gates Manage User, Invite Data, Profile Review, and bulk invite. The Features card shows live consumption so admins know remaining capacity before the next intake.

USER MANAGEMENT CARD FIELD	EXAMPLE
Total Capacity	5,000 licensed users
Utilization	20% · 1,000 Invited
Domestic users	501 of 4,001 limit
International users	499 of 4,001 limit

WHEN ACTIVE	WHEN INACTIVE
Manage User · Invite Data · Profile Review · Add User / bulk invite (within capacity) · Dashboard people counts	No user invitation or directory tools · Cannot onboard through Intoto

● PRODUCT

Seat-based licensing with transparent utilization — prevents over-inviting and supports domestic/international pricing tiers.

● QA FOCUS

Invite blocked at capacity; utilization figures match Manage User counts; domestic/intl split enforced if configured.

● **MARKETING**

"Invite exactly as many students and staff as you've licensed — with live utilization on every admin screen."

07 Mobility Program

Portal card copy: Manage academic exchange lifecycle.

The **Mobility Program** paid feature digitizes the academic mobility lifecycle for Mobility Offices: application review, student approval decisions, nomination to partner universities, program and partner management, document oversight, reports, and admin notifications. It is designed for a 430px mobile-first web shell and introduces a dedicated **Mobility Program Admin** role for day-to-day mobility operations.

What Mobility Program unlocks

Role Selection → Mobility Admin route → Command Center → approval queue → application detail with approve/reject/request-more-info actions → nomination hub for approved students → program catalog → partner university directory → document review → operational reports and settings. University-level admins keep institutional oversight through partner, budget, program, user, and report views.

Platform entry flow

ROLE SELECTION CARD	ROUTE	LANDING SCREEN	PRIMARY AREAS
Student	/student	Home Dashboard	Journey · Tasks · Documents · Chats · Profile
Mobility Program Admin	/mobility-admin	Command Center	Stats · Approvals · Nominations · Programs · Partners
University Admin	/admin	Dashboard	Stats · Budget · Campus Network · Reports · Users

Core operating model

AREA	WHAT THE MODULE PROVIDES
5-stage mobility lifecycle	Application → Review → Nomination → Pre-Departure → In Mobility. Admins own Review and Nomination; student preparation and exchange participation remain the student-facing side of the module.
Command Center	Mobility Program Admin dashboard with total students, pending approvals, active programs, total partners, approval activity feed, quick actions, and pending approvals summary.
Application review	Searchable/filterable student and application queues, priority badges for high-GPA applications, detailed review screens, document checks, review notes, and decision actions.
Nomination Hub	Eligible approved students, nominated vs pending counts, nominate toggle buttons, and partner university selection for assignment.
Programs & partners	Mobility program catalog, program detail pages, partner university directory, partner detail pages, agreement status, active programs, student counts, and ranking/context fields.
Reports & documents	Document summary and category filters; report catalog with annual, quarterly, evaluation, survey, and financial reports plus detail, metrics, and export actions.

Admin flow diagrams, summarized

Mobility Program admin flow

STUDENT ACTION

Student

User-facing step in the student journey.

STUDENT STARTS

Application + documents

Student submits mobility application and supporting documents.

Outcome: the student record, journey stage, or visible app status changes.

INFORMATION TAKEN

Application form, statement of purpose, transcripts, passport or required documents.

HOW IT IS REVIEWED

System stores the submission and sends it to the admin queue.

DECISION / RESULT

Student enters Application stage and waits for review.

STUDENT ACTION

STUDENT STARTS

Application + documents

Student submits mobility application and supporting documents.

ADMIN ACTION

ADMIN REVIEWS

Approval Queue

Admin opens detail, checks GPA, documents, eligibility, and notes.

DECISION PATH

DECISION

Approve / reject / request info

Approved students become eligible for partner nomination.

ADMIN ACTION

ADMIN REVIEWS

Non Hub

Admin partner and the a student

Mobility Program Admin role

This role is for Mobility Office staff who run mobility operations every day. They work at the individual student and program level, not the whole tenant governance level.

CAN DO	TYPICAL SCREENS
Review applications, documents, GPA, eligibility, and review notes.	Approval Queue · Application Detail · Student Detail
Approve, reject, or request more information from applicants.	Application Detail · Student Detail
Nominate approved students to partner universities.	Nomination Hub
Manage day-to-day program and partner information.	Programs · Program Detail · Partner Universities · Partner Detail
Generate operational mobility reports and review document summaries.	Reports · Report Detail · Documents
Maintain admin profile, office hours, localization, and notification preferences.	Settings · Profile · Notifications

Institutional oversight

At university level, senior admins use the module to monitor campus network health, partner agreements, budget utilization, program portfolio, system users, and institutional reporting. This is oversight and governance; day-to-day approvals and nominations stay with Mobility Program Admins.

INSTITUTIONAL VIEW	PURPOSE
Dashboard	Total students (4,500), mobility students (142), partners (45), programs (12), annual budget (EUR 2.4M), budget utilization (78%), campus network summary, recent reports, and quick actions.
Campus network	Partner universities with agreement type, active/under-review status, renewal action, student counts, contact path, and agreement health.
Reports	Institutional reporting with type filters, total mobility, completion rate, budget used, satisfaction, and export options.
Programs	Full program portfolio with enrollment progress, partner universities, and edit/manage actions.
User management	System user list for Mobility Program Admins, University Admins, and Students, with add-user flow where licensed.

WHEN ACTIVE	WHEN INACTIVE
Mobility Program Admin role card · Mobility command center · application review · nomination hub · mobility programs · partner universities · admin documents · mobility reports · institutional oversight dashboards	No Mobility Program Admin role · no mobility application, approval, nomination, program, partner, or mobility-reporting surfaces

Role guide: Day-to-day operational flows are documented in the [Mobility Program Admin Feature & Flow Guide](#).

● PRODUCT

Mobility Program turns an email-and-spreadsheet international office process into one governed lifecycle with clear admin decisions and partner nomination tracking.

● QA FOCUS

Module Active → Mobility Program Admin role is available; approval and nomination screens route correctly; high-GPA priority badges, filters, decision confirmations, report exports, and partner/program detail links work. Inactive → all mobility surfaces hidden.

● MARKETING

"Run exchange applications, approvals, nominations, programs, partners, and reports from one academic mobility workspace."

■ ROLES & RESPONSIBILITIES

Who provisions vs who views

ROLE	WHAT THEY DO WITH PAID FEATURES
Intoto Admin (platform)	Provisions modules when onboarding or updating a university · Sets contract dates, seat capacity, and Active state · Works with sales/onboarding — see Intoto Admin guide → Features for universities
University Super Admin (tenant)	Read-only view on My University → Features · Confirms entitlements before operations · Cannot enable/disable modules — see University Super Admin guide → Features
Sales / account team	Agrees module mix and contract terms with the university · Requests Intoto Admin to provision changes

ROLE	WHAT THEY DO WITH PAID FEATURES
Students & staff	Experience only the modules their university has purchased — inactive modules are invisible in the app and portal
