

■ PAID FEATURE · USER MANAGEMENT

User Management: seats, invites, roles, and profile review.

The foundation module for onboarding people into Intoto. It controls licensed capacity, invitation flows, user directories, role assignment, profile review, and utilization visibility.

PRIMARY USERS

University Super Admin · All invited users

COMMERCIAL MODEL

Standalone seat-based module

[← Back to Paid Features catalog](#)

■ FEATURE OVERVIEW

The module every tenant needs before inviting people.

User Management lets a university control who enters Intoto and how many users are allowed under the contract. It supports individual invites, bulk invite/import, role assignment, profile review, suspension, and utilization reporting.

What the client gets

When Active, the module unlocks Manage User, Invite Data, Profile Review, Add User, bulk invites, capacity tracking, domestic/international split where configured, and dashboard people counts. When inactive, user onboarding tools are unavailable.

5k

Example total licensed capacity

20%

Example utilization visibility

2

Optional domestic and international buckets

All

Roles depend on invite and seat control

Sales story: User Management is the commercial control point. It lets the university see exactly how much of the purchased capacity is used and prevents uncontrolled onboarding beyond the contract.

■ WHAT ADMINS CAN DO

Every invitation and role begins here.

INVITE

Add one user

BULK

Upload invite data

Admins invite a person with email, name, role, campus, student/staff type, and required profile fields.

Bulk invite supports intake waves so universities can onboard large cohorts without manual entry.

ROLES

Assign correct access

Users receive role-specific access such as Student, Ambassador, Coordinator, Third-Party Coordinator, or admin roles.

CAPACITY

Enforce seat limits

The system tracks invited users against purchased capacity and can block or warn when the limit is reached.

REVIEW

Profile review

Admins inspect submitted profiles, verify required details, and resolve incomplete or incorrect records.

SUSPEND

Control access lifecycle

Admins can suspend or manage users when access should change after intake, graduation, or policy action.

Detailed functionality map

AREA	DETAILED FUNCTIONALITY	WHAT THE CLIENT CAN EXPLAIN
Invite data	Name, email, role, campus, student/staff type, domestic/international bucket, and optional cohort/program metadata.	Every user starts from controlled university-provided data.
Bulk onboarding	Admins upload or prepare invite batches for large student intakes, staff groups, ambassadors, or coordinators.	Large universities do not need to invite every user manually.
Role assignment	Student, Ambassador, External Ambassador, Community Coordinator, Event Coordinator, Third-Party Coordinator, Mobility Program	Access is shaped by role, not by one

AREA	DETAILED FUNCTIONALITY	WHAT THE CLIENT CAN EXPLAIN
	Admin, University Admin, and related roles where enabled.	generic user account.
Capacity enforcement	Total capacity and optional domestic/international limits are checked before inviting or activating more users.	The university cannot silently exceed the purchased contract.
Profile review	Admins check completed profiles, missing fields, wrong details, duplicate records, and suspicious or incomplete information.	Bad records can be corrected before they affect operations.
Suspension	Admins can suspend access when a user graduates, leaves, changes role, violates policy, or should no longer access the tenant.	User lifecycle is governed beyond initial invitation.

■ ANIMATED EXPLANATION

How user information is checked before access is granted.

CURRENT ACTOR

University Super Admin

Tenant-level control, reporting, and entitlement visibility.

GOVERNANCE · 1 OF 9

Prepare user invite

Admin creates an individual or bulk invite.

Outcome: Invite is ready for capacity validation.

INFORMATION TAKEN

User name, email, role, campus, user type, domestic/international bucket, and invite source.

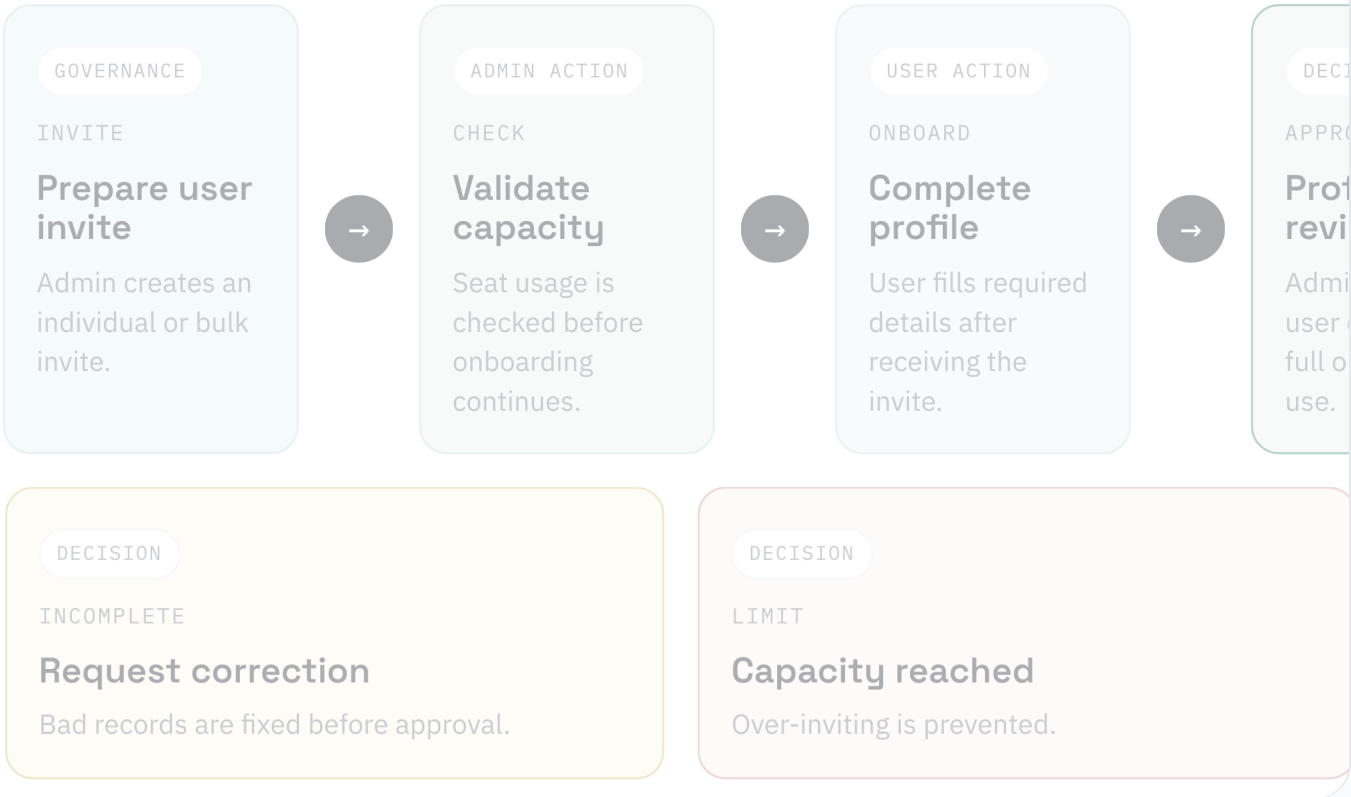

HOW IT IS REVIEWED

Admin confirms the person belongs to the university and chooses the correct role.

DECISION / RESULT

Invite is ready for capacity validation.

Invite, capacity, and profile review flow

■ CAPACITY MODEL

What the Features card shows.

FIELD	MEANING	CLIENT VALUE
Total Capacity	Maximum number of licensed users.	Commercial clarity before large intake periods.
Utilization	How many users have been invited or consumed.	Admins know remaining capacity instantly.
Domestic users	Bucket for domestic user allocation where configured.	Supports split pricing or operational segmentation.
International users	Bucket for international user allocation where configured.	Useful for universities with distinct intake groups.
